

Sriizan (Promohomex)

Platform Working Guide — System Architecture & Features

React 19 • Node.js 24 • MongoDB Atlas • Razorpay • v2.4 • 2026

About this Guide: A complete reference for Sriizan's features, user journeys (Buyer, Builder, Resale), payment gateway, and admin controls.

1. What is Sriizan?

Sriizan is a PropTech (Property Technology) platform that brings 100% transparency between under-construction real estate buyers and builders in India. Buyers can track live construction stages, view financial appreciation, and access all their property documents in one secure place.

Traditional Problems	Sriizan's Solution
- No visibility into construction delays. - Documents scattered (BBA, NOC, Receipts). - Fraud risk and no transparent resale pricing.	- Live % progress per stage + site photos. - Digital Document Vault — everything in one place. - Verified Resale Marketplace — zero fraud.

2. User Roles & Access Levels

Role	Responsibilities	Page / URL	Authentication
Buyer	View live construction, financials, and documents for their booked flat.	/dashboard	Email + Password (JWT Token)
Admin (Builder)	Update stages, upload photos, manage prices, dispatch documents, approve buyers.	/admin	Admin Role (Protected)
Investor (Public)	Browse verified resale listings, list their own property, calculate ROI.	/resale	No Login Required

3. Step-by-Step: How It Works

Complete flow from a new buyer arriving on the website to receiving possession:

1	User Registration & Login Buyer signs up with name, email, mobile, and password. Password is hashed with bcryptjs and stored securely in MongoDB Atlas. A JWT authentication token is issued on login.
2	Register Booked Property Buyer fills in Project Name, Tower, Unit Number, and Booking Price. The system auto-assigns a unique Property ID (e.g. PH-101).
3	Razorpay Payment — Rs. 699 Lifetime Tracking Pass Buyer pays Rs. 699 via UPI, Card, or NetBanking. Backend validates HMAC SHA-256 cryptographic signature and auto-generates an official GST Tax Invoice.
4	Admin Verification & Approval The new booking appears as 'Pending Verification' in the Admin Panel. After the builder verifies, the property gets a green 'Verified' badge on the buyer's dashboard.
5	Live Dashboard — 24x7 Access Buyer can view construction milestones, drone survey videos, property appreciation, and demand letters in real-time from their personalized dashboard.

4. Buyer Dashboard — 5 Core Modules

Construction Progress Tracker 6 live milestone stages: Foundation & Excavation: 100% RCC Superstructure (18 Floors): 100% Brickwork & Plastering: 85% Electrical & Plumbing (MEP): 60% Flooring, Paint & Fixtures: 20% OC & Possession: Upcoming Site drone survey video + monthly hi-res photos.	Investment & Valuation Dashboard Complete financial snapshot: Booked Price: Rs. 1.25 Cr Builder Current Price: Rs. 1.52 Cr Resale Market Price: Rs. 1.68 Cr Total Appreciation: +Rs. 43 Lakhs (+34.4%) Payment Ledger: Amount paid vs. pending demands.
Property Document Vault All legal documents secured: GST Tax Invoice (Rs. 699 Receipt) Allotment Letter & Builder-Buyer Agreement NOC & Encumbrance Certificate One-click instant PDF download.	Unit Types & Spatial Layouts All flat configurations with specs: 2 BHK Executive — 1,250 sqft, Rs. 88.5L 3 BHK Royal — 1,680 sqft, Rs. 1.24 Cr 4 BHK Duplex Villa — 2,850 sqft, Rs. 2.45 Cr Rental Yield: 4.8% to 6.1% p.a.

Notifications & Alerts Real-time updates: Unread push alerts on bell icon Construction milestone announcements Payment demand reminders Market price update notifications.	Market Insights Data-driven analysis: Nearby comparable resale listings Price appreciation history chart ROI Calculator tool Investment trend analysis.

5. Admin / Builder Control Panel

The Admin Panel (/admin) is secured exclusively for authorized builder management. All project controls are managed from here.

Feature	What It Does	Impact on Buyer
Directory & Search	Full list of all registered buyers with unit, tower, and payment status filters.	Buyer data stays secure and fully recorded.
Stage Progress Editor	Slider to set any stage percentage (0-100%). Overall progress auto-recalculates.	Dashboard graph updates live instantly for the buyer.
Price Manager	Update builder's current price and resale market price.	Buyer sees updated ROI % and appreciation value.
Site Media Uploader	Upload new site photos. System auto-compresses to WebP at 70% quality.	Buyer can view latest construction photos from home.
Document Dispatcher	Send demand letters, NOC, or payment receipts directly to buyer's vault.	New file appears in buyer's Document tab for download.
Broadcast Alerts	Push notification for construction milestones or slab casting events.	Unread alert on bell icon — instant notification.
Buyer Approvals	Verify new bookings and mark them as Approved.	Green 'Verified' trust seal appears on buyer's account.

6. Resale Marketplace

Sell My Property Any existing buyer can click 'Sell My Property' from the Navbar or Homepage to list their flat on the resale marketplace.	100% Verified Listings Only flats whose construction stage, legal documents, and ownership have been verified by Sriizan appear on the marketplace.	Transparent Deals New buyers can view construction progress, owner details, and payment history before locking any deal.
--	---	--

7. Razorpay Payment Flow (Rs. 699)

Step 1 — Create Order: Backend calls `/api/payment/create-razorpay-order` to generate a secure server-to-server Razorpay order.

Step 2 — Checkout Popup: Frontend loads the official Razorpay SDK popup supporting UPI, Credit/Debit Cards, and NetBanking.

Step 3 — HMAC SHA-256 Verify: On payment success, backend validates the Razorpay signature using the secret key. GST Invoice is generated only after successful signature match.

8. Technology Stack

Layer	Technology	Purpose & Key Features
Frontend	React 19, Vite 8	Fast component rendering, Hot Module Replacement (HMR), SPA architecture.
Styling & Animation	Tailwind CSS v4, Framer Motion	Responsive design, smooth animations, 3D card tilt effects, Liquid Glass UI.
Backend API	Node.js 24, Express 5	RESTful API server, modern ES Modules syntax, all business logic.
Database	MongoDB Atlas (Mongoose ODM)	Scalable cloud database with separate Users and Properties collections.
Security & Auth	JWT, bcryptjs, Helmet, Rate-Limit	Password hashing, secure JWT sessions, 100 requests/15 min brute-force protection.
Payment Gateway	Razorpay Live API	UPI, Credit/Debit Card, NetBanking with HMAC SHA-256 signature verification.
Icons & Routing	Lucide React, React Router DOM v7	Consistent icon system, client-side routing with protected routes.
Testing	Vitest, Supertest	Unit tests and API integration tests — run with npm run test.

9. Commands to Run the Project

Server	Command	URL / Output
Backend API Server	npm run server	http://localhost:5001
Frontend Dev Server	npm run dev	http://localhost:5173
Run All Tests	npm run test	Vitest + Supertest output
Production Build	npm run build	./dist/ folder
Preview Build	npm run preview	http://localhost:4173

Conclusion: Sriizan (Promohomex) is a complete 360-degree real estate digital ecosystem. It gives buyers peace of mind, builders credibility and trust, and the secondary market a transparent, fraud-free resale platform — all in one place.
